

LAA2 targets

- NI 185: CO2 reduction from local authority operations
- NI 188: Adapting to climate change

NI 185: CO2 reduction from local authority operations

- 8% reduction on 2008 baseline by 2011
- Approx $\frac{3}{4}$ of emissions from OCC
(OCC 63,000 tonnes CO2 in 2005/06 cp with Oxford City Council 9,849 tonnes)
- Baseline by July 2009; refresh now

NI 185 - Scope

In:

- Buildings
- Travel at work
- Outsourced Contractors' emissions

Out:

- Travel to work
- Waste

Progress:

- Delivery group - forum for sharing practice and support; event later in year
- All DCs have baselines for 2007-08

Issues:

- Measuring contractors' emissions
- Final reporting date – July 2011

NI 188 – adapting to climate change

- All local authorities to have reached level 3 by 2011
- Target to reach level 1 by April 2009
- Revised guidance published in January 2009

Highlights

- Initial baseline data collected (LCLIPs)
- Workshop with UKCIP on 3 December to review progress and share practice
- On target to reach level 1

Challenges

- Project planning, priorities, resources
- Widening group membership

Target levels

- 0 Getting started
- 1 Public commitment and impacts assessment
- 2 Comprehensive risk assessment
- 3 Comprehensive action plan
- 4 Implementation, monitoring and continuous review

FUTURE FIRST

Reducing our environmental footprint
