

Oxfordshire Local Investment Plan 2010

Foreword

I know I speak for all the District Councils in Oxfordshire and the County Council too when I say how pleased we were when Oxfordshire was selected by the Homes and Communities Agency (HCA) as

one of the pilot areas for their new 'Single Conversation'. We agreed with the HCA that the Spatial Planning and Infrastructure Partnership (SPIP) and its supporting Executive Group would conduct the 'Single Conversation' on behalf of Oxfordshire. We are grateful to David Edwards, Regional Director for the South East, and his team for selecting us as one of their pilots and for working with us to prepare this Local Investment Plan (LIP).

The LIP outlines and integrates, for the first time, the housing, economic development and infrastructure plans for the next 20 years of Cherwell, Oxford, South Oxfordshire, Vale of White Horse and West Oxfordshire District Councils, Oxfordshire County Council, the Oxfordshire Primary Care Trust, the Highways Agency, Network Rail, and the Environment Agency. It lays out how we are all working together to deliver new housing as part of creating sustainable communities.

This LIP provides a robust foundation for our continuing conversation with the HCA as we move on to discuss and agree the Local Investment Agreement. We will do this in light of the publication of the Comprehensive Spending Review (CSR) and confirmation of the nature of future HCA funding streams and the funds allocated to the South East and Oxfordshire.

At the same time, the LIP adds value to a number of current discussions, including economic development across the county, the next Local Transport Plan, and the five Local Development Frameworks. It is necessarily an evolving document, which we will review and update regularly.

We finalise this LIP just as we are heading into a General Election. Much of the national and regional strategic framework under which we have developed this document could look very different in the future. I believe we are better prepared to respond to potential future changes now we have this LIP.

Councillor Barry Wood

Chairman, Oxfordshire Spatial Planning and Infrastructure Partnership

31 March 2010

Executive summary

Introduction

This Local Investment Plan for Oxfordshire, finalised in March 2010, is the first formal document resulting from Oxfordshire's 'Single Conversation' with the Homes and Communities Agency (HCA). The 'Single Conversation' is the process through which local authorities, in collaboration with the HCA, the Government Office for the South East (GOSE) and other key partners, develop a Local Investment Plan (LIP) and a Local Investment Agreement (LIA). Oxfordshire was chosen as one of three pilot areas in the South East, the others being Kent Thames Gateway and Portsmouth and Urban South Hampshire (PUSH).

While local authorities have a leading role in developing the 'Single Conversation', reflecting their responsibilities in setting out future ambitions and visions for their areas, other key stakeholders also need to be involved. This LIP has been prepared by the Oxfordshire Spatial Planning and Infrastructure Partnership (SPIP) and sets out a shared vision and priorities for delivering housing growth, economic development, regeneration, and infrastructure; in other words 'sustainable place making'.

This LIP outlines and integrates the plans of Cherwell, Oxford, South Oxfordshire, Vale of White Horse and West Oxfordshire District Councils, Oxfordshire County Council, the Highways Agency, Network Rail, the Environment Agency and the Oxfordshire Primary Care Trust to deliver housing and economic growth and associated strategic infrastructure to 2030. Collectively, these plans will begin to meet the requirements of the South East Plan, the Regional Economic Strategy, the five Local Development Frameworks, Oxfordshire 2030, and the five District Sustainable Community Strategies.

Our opportunities and challenges

This LIP responds to the opportunities and challenges in housing growth and economic development that the members of the Oxfordshire SPIP are tackling individually and collectively.

Oxfordshire is renowned as a place of architectural and natural beauty. The internationally famous city of Oxford is at the heart, with a series of historic market towns serving communities across the county and including Abingdon, Banbury, Bicester, Henley, Thame, Wallingford, Wantage and Witney. Oxfordshire has many villages set in attractive countryside, including three areas of outstanding natural beauty: the Chilterns, the Cotswolds and North Wessex Downs.

Oxfordshire is also acknowledged internationally as a centre of excellence for learning and research, with the highest concentration of science and biotechnology industries in Western Europe. It plays a critical role in the regional and national and, in many respects, international economies.

Over the next 20 years, we expect significant population and development growth across Oxfordshire. All SPIP partners face difficulties in managing that growth in a way that meets economic, housing and regeneration pressures and provides sufficient infrastructure. At the same time, the environmental quality of the county and our impact on environmental sustainability are major considerations for us.

Economic prosperity and quality of environment make Oxfordshire an attractive place. But there are pockets of deprivation where residents have low wages, few skills and poor housing; where young people do not fulfil their potential at school; and where older people have poorer health and significantly shorter life expectancy. The LIP can play a vital part in tackling these issues.

Our priorities

This LIP has four overall strategic objectives – to:

- deliver new housing, including affordable homes
- support economic growth
- achieve regeneration and tackle deprivation, and
- contribute to meeting strategic infrastructure needs.

The LIP focuses mainly on our five-year county-wide development programme to meet these strategic objectives. All the schemes outlined in this document are priorities for Oxfordshire, given the pressing need for more homes and for the transport, employment, education and other infrastructure they will require.

From our five-year development programme we have derived a shortlist of the 17 housing schemes and 36 strategic infrastructure schemes we believe to be top priorities. Some of the housing schemes already have planning permission. Others are likely to be granted planning permission soon. Taken together, these 17 housing schemes could deliver over 17,000 new homes, 7,200 of which would be 'affordable' (contributing to a South East Plan 2006-2026 requirement for 55,000 new homes, of which 22,000 need to be affordable).

Many of the schemes in our overall five-year programme will come forward without public-sector intervention from the HCA or any other organisation. However, these shortlisted schemes are those we would like the HCA to treat as being the highest priorities for immediate public-sector investment. We will review this shortlist again once we know the nature and extent of future HCA funding, and may draw other or alternative schemes from the overall development programme onto this shortlist as a result.

Place making across Oxfordshire

We consider housing growth and strategic infrastructure investment as a whole in 11 key urban localities. We also consider housing growth and strategic infrastructure across all the rural areas as in effect a twelfth locality. The localities are:

- Abingdon and Faringdon
- Banbury
- Bicester and Upper Heyford
- Botley
- Didcot
- Oxford
- Science Vale UK
- Thames and Chinnor
- Wallingford and Cholsey
- Wantage, Grove and Harwell
- West Oxfordshire strategic sites
- Rural housing sites across Cherwell, South Oxfordshire, Vale of White Horse and West Oxfordshire.

Next steps

The LIP is a living document. The SPIP will review it every 18 months to ensure it reflects the evolution of the five Local Development Frameworks and other local strategies as well as national and regional strategies. The SPIP will also need to review how far we proceed with short-term housing and infrastructure plans in light of continuing market difficulties.

The priorities identified in this LIP will inform the development of Oxfordshire's Local Investment Agreement (LIA) with the HCA. The SPIP and the HCA are working together to produce the LIA, which will detail future HCA funding commitments, by end June 2010.

The LIP's overview of the public-sector investment required to deliver affordable housing and infrastructure will provide a firm foundation for discussion with other national, regional and sub-regional agencies around how they might best support local development aspirations.

SPIP partners will also seek to engage other partners in this LIP. House builders, for example, both private and social, have a central role in delivering the housing growth in Oxfordshire and need to understand this LIP. We hope the document will lead to greater certainty and clarity among all stakeholders.

The LIP will support the SPIP in informing and testing the Local Transport Plan 3 (LTP3) as it progresses through crucial consultation stages. The LIP will also influence the economic development policies and actions that will emerge from the review of the Oxfordshire Economic Strategy. It will be vital in informing SPIP members' individual and collective thinking on the infrastructure required through S106 agreements, the new Community Infrastructure Levy or other ways of getting contributions from developments in the future.

Part 1: Our vision

Context

Oxfordshire is renowned as a place of architectural and natural beauty. The internationally famous city of Oxford is at the heart, with a series of historic market towns serving communities across the county and including Abingdon, Banbury, Bicester, Henley, Thame, Wallingford, Wantage and Witney. Oxfordshire has many villages set in attractive countryside, including three areas of outstanding natural beauty: the Chilterns, the Cotswolds and North Wessex Downs.

Oxfordshire is acknowledged internationally as a centre of excellence for learning and research, with the highest concentration of science and biotechnology industries in Western Europe. Some of the world's foremost academic institutions and major research and development organisations are here. The University of Oxford and Oxford Brookes University have strong links to a network of high technology companies located throughout the county. 'Science Vale UK', in the southern part of the county, is a concentration of important research establishments, including the Harwell Science and Innovation Campus; Milton Park, Didcot; and Wantage and Grove.

Over the next 20 years, we expect significant population and development growth across Oxfordshire. All SPIP partners face difficulties in managing that growth in a way that meets economic, housing and regeneration pressures and provides sufficient infrastructure. At the same time, the environmental quality of the county and our impact on environmental sustainability are major considerations for us.

Over the next 20 years Oxfordshire's population is expected to grow by 12%, while over the same period the number of people aged 75 and over is expected to grow by 60%. The number of people aged over 85 is expected to double. Growth in

the number of older people has implications for the type of housing and services that will be needed. It will be critical to ensure that appropriate housing and support are available for our older people, to enable them to remain independent or live in homely environments in the community (or both) for as long as possible.

The South East Plan provides for the building of over 55,000 new homes between 2006 and 2026, of which 22,000 homes should be affordable. Within the South East Plan, Central Oxfordshire is established as a sub-region, with Oxford providing higher-order services (including retail, health, and education) for the surrounding area. This sub-region has been identified as one of eight 'Diamonds for Investment and Growth' in the Regional Economic Study and will provide much of Oxfordshire's housing growth. The main locations identified for development are Bicester, Didcot, Oxford, and Wantage and Grove. Bicester has been selected as one of the first four government-backed eco towns in the country, with a 5,000-home eco development at NW Bicester.

Outside the major towns, Oxfordshire is mainly a rural county, with a large number of villages and hamlets. Access to affordable housing in rural areas is restricted by the small number of properties coming onto the market. The effect is a lack of new housing options and the departure of young people from rural areas.

There will be a need for considerable investment in new infrastructure to meet the pressures on essential services such as schools, transport and other community facilities against a background of reducing spending by the public sector.

Public transport increases access to jobs and services, and reduces road congestion and carbon emissions. While Oxford has an extensive public transport system, many parts of Oxfordshire experience real isolation and would greatly benefit from improved public transport services and infrastructure.

A rapid and substantial growth in demand for primary school places is forecast over the period to 2016. Oxfordshire's 43 secondary and special schools are being included in the Building Schools for the Future programme – the government's largest public works programme. The multi-million pound programme will be carried out in six phases over the next 15-20 years. The project aims to raise educational achievement in Oxfordshire by providing world-class learning facilities, inspiring young people to realise their potential.

Economic prosperity and quality of environment make Oxfordshire an attractive place. But there are pockets of deprivation where residents have low wages, few skills and poor housing; where young people do not fulfil their potential at school; and where older people have poorer health and significantly shorter life expectancy. The LIP can play a vital part in tackling these issues.

Vision

The Oxfordshire Partnership sets out in Oxfordshire 2030 (Oxfordshire's Sustainable Community Strategy) a vision based on the following ambitions:

- Create a world-class economy for Oxfordshire, building particularly on the high-tech sector.
- Have healthy and thriving communities to sustain what is good about the city, towns and villages while also responding to the needs of the 21st century, including the impact of demographic and lifestyle changes.
- Look after the environment and respond to the threat of climate change and the potential for more extreme weather conditions, particularly the threat of flooding.
- Break the cycle of deprivation by addressing the regeneration needs of disadvantaged communities; reducing the gap between the best and worst off, and

helping people maximise their talents and raise their aspirations.

Each local authority has developed its own vision, ambitions and priorities for its area, which inform and are informed by the Oxfordshire 2030 vision. A summary of each community strategy and corporate plan is set out in Appendix 2.

Strategic objectives

Four strategic objectives for this LIP result from this vision. They are of equal weight and have been used to arrive at the LIP's priorities. The strategic objectives are to:

- deliver new housing, including affordable homes
- support economic growth
- achieve regeneration and tackle deprivation, and
- contribute to meeting strategic infrastructure needs.

Deliver new housing, including affordable homes

Oxfordshire has a tremendous need for more housing of various types. Challenges include:

- the need for affordable homes
- geographic demands, both urban and rural
- providing for a variety of household sizes, particularly for young families and the elderly
- the need to provide supportive housing for those with physical or learning disabilities, and
- the demand for specialist housing e.g. Gypsy and Traveller sites.

This LIP identifies 43 priority housing-led schemes that are deliverable in the next five years. While these schemes vary by

location and scale, the common aim is to deliver housing, including affordable homes, to support the local economy and the development of healthy and thriving communities. These schemes could deliver 21,520 homes by 2015, of which 8,946 would be affordable.

At the same time we will continue to maximise the use of existing stock, fill empty properties and encourage under-occupiers to move to smaller accommodation – all of which help meet housing need as well as wider objectives.

Support economic growth

While Oxfordshire has a strong economy, attributed in part to the knowledge-based industries centred on Oxford and Science Vale UK, we have been affected by the global economic crisis. As the country comes out of the recession, it is particularly important to maintain a strong diverse economy and provide opportunities for growth and inward investment. In the past, we have been too complacent. The challenges ahead mean we must take a proactive approach. This includes allocating more land for economic development. The priority employment-led economic development schemes in this LIP include Bicester Business Park, Oxford and Science Vale UK. We also seek to raise educational attainment, improve skill levels to support the needs of local businesses, and help young people find work.

Achieve regeneration and tackle deprivation

There are pockets of relative deprivation in Oxfordshire, characterised by poorer housing stock, limited access to job opportunities, lower-paid jobs, limited educational attainment, poor health and shorter life expectancy. Regeneration is about tackling social and economic issues as well as about the physical changes to an area.

In Oxfordshire, the places with the highest levels of deprivation are parts of Banbury and Oxford. The priority regeneration schemes are the Canalside area in Banbury and Barton, and Blackbird Leys, Greater Leys, Rose Hill and Wood Farm in Oxford. These schemes provide particular benefits in tackling the cycle of deprivation through revitalising each area to improve the quality of life for residents and businesses.

Oxford also has a homelessness problem. Over recent years, partners in Oxford have done great work to provide services and programmes for the homeless, but the city still attracts homeless people from across the region. Oxford continues to work on several homelessness projects, including the Old Fire Station.

Contribute to meeting strategic infrastructure needs

In this LIP we distinguish between key infrastructure needed for housing and economic growth, such as a new hospital or improvements to a motorway junction ('strategic' infrastructure), and the infrastructure needed as a direct result of a single development, such as an extension to a school ('mitigation' infrastructure).

Building strategic infrastructure helps create a complete place by providing access and amenities or contributing to the overall sustainability of the existing or new community. Strategic infrastructure is important to the delivery of many of the housing, employment or regeneration-led schemes identified in this LIP.

Through the Single Conversation, 47 strategic infrastructure schemes have been identified. These cover:

- public transport facilities
- improvements to and additional road schemes
- education programmes and facilities
- community amenities, facilities and services

- improvements to hospitals and emergency services
- waste management sites, and
- green infrastructure to improve energy efficiency, mitigate the effects of climate change and create more sustainable places.

We will need to invest heavily in transport to facilitate new development; improve accessibility by alternative modes of transport; and enable people to get to work, education and other key services. Key to this will be:

- enabling the A34, and the network in its vicinity, to fulfil its various local and international roles
- securing improvements to junctions 9 and 10 of the M40
- delivering strategic rail network enhancements, such as the East-West rail and Evergreen (Chiltern Rail) projects
- implementing 'Access to Oxford', and
- transforming transport in Oxford.

Shared ambitions

A series of shared ambitions for Oxfordshire underpin the vision and strategic objectives:

Economy

- Create a world-class economy – as a world leader in education, science and technology.
- Contribute to and benefit from economic prosperity.
- Create prosperous, inclusive and thriving communities in urban and rural areas.
- Provide good access to a range of jobs.

Education and skills

- Develop an educated and skilled workforce.
- Provide services to ensure that everyone can realise their potential.

Housing and affordable housing

- Deliver more housing, including affordable housing and key worker housing.
- Provide good access to a range of housing options.
- Create high-quality and sustainable homes.
- Regenerate areas and communities.
- Provide for more rural housing.
- Provide decent Gypsy and Traveller sites that offer access to sufficient services.

Health and social inclusion

- Create safer, stronger, healthier, more cohesive communities.
- Break the cycle of deprivation through the regeneration of disadvantaged communities, and reduce inequalities.
- Provide for an ageing population, for example offering opportunities for independent living.
- Encourage active participation in local communities.
- Provide good access to a range of services.

Infrastructure

- Coordinate infrastructure investments to support new development.
- Improve existing infrastructure, including public transport, to facilitate access to employment and services.

Services (especially rural services)

- Maintain or enhance local services, particularly in rural communities.
- Improve access to basic services by alternative modes of transport.

Sustainability

- Ensure everyone can feel safe and enjoy life.
- Meet the needs of current and future generations without compromising the natural and built heritage or significantly changing the intrinsic character of the district.
- Continue to make Oxfordshire one of the best places to visit or live, work and play in.
- Ensure new development respects and complements the distinctive character of Oxfordshire.
- Maintain a network of safe, inclusive, vibrant and prosperous market towns and villages.
- Create and maintain a healthy and attractive environment.

Environment

- Ensure an outstanding environment and high quality of life.
- Look after our environment.
- Improve the quality of our built environment.

Climate change

- Reduce greenhouse gas emissions to mitigate adverse impacts of climate change, through:
 - zero carbon developments, and
 - waste and carbon reduction.
- Adapt to cope with the impacts of climate change, particularly flooding.
- Provide alternative transport options.

Part 2: Our priorities

How we decided our priorities

Our prioritisation criteria are set out in Appendix 3. They have been used to identify the housing growth and associated infrastructure schemes in our five-year development programme. For each scheme we have considered:

- whether it is achievable in the short term
- whether it accords with and links to long-term plans
- how it will promote housing and economic development
- its wider benefits, including social, transport and sustainability
- the overall investment required
- value for money
- an assessment of the risk.

Appendix 5 includes a detailed assessment sheet for each scheme.

Development programme 2010–15

Over the next five years the priority development programme for Oxfordshire comprises 97 schemes:

- 43 housing schemes
- 3 economic development schemes
- 4 regeneration schemes, and
- 47 strategic infrastructure schemes.

Taken together, these schemes could deliver 22,920 homes, including 9,226 affordable homes.

Shortlist 2010–15

From this five-year programme we have produced a shortlist of 17 housing schemes (shown in Table 1). These schemes are seen as the most important by SPIP partners, and best meet the prioritisation criteria in Appendix 3. This highest-priority list could deliver 17,713 homes, including 7,237 affordable homes, over the next five years. It is important to note that these are the agreed priorities as we publish this Local Investment Plan in March 2010. All SPIP partners think that every scheme on the long list of short-term deliverable schemes requires funding. However, if there is not enough money in the future to pay for all the short-term deliverable schemes, funds should be used for the highest-priority shortlist.

Table 2 identifies the strategic infrastructure necessary to deliver these 17 top-priority housing schemes.

Development programme to 2030

Each local authority has also taken a long-term view of which sites and schemes are likely to come forward over the next 20 years (2010-30). The long-term sites are identified mainly on evidence from the Strategic Housing Land Availability Assessments and the emerging Local Development Frameworks, and the local knowledge of the housing and planning teams. This information is key when taking a long-term view of the development pressures facing an area, and the infrastructure needed. The long-term development programme for each district is in Appendix 6.

Table 1: Top-priority growth schemes ('shortlist') deliverable in the short term 2010–15

District	Scheme	Total homes 2010 -2030	Number of homes 2010 -2015	Number of affordable homes 2010 -2015
Oxford	Oxford small and medium sites (including Blackbird / Greater Leys and windfalls) (HRA Land Capacity tbc)	n/a	3,222	1,344

Total: 36 schemes			

Part 3: Place making

Place making is a holistic approach to development in a locality. We have considered by locality what development is expected to take place, and the infrastructure required to deliver it, and identified the various funding streams and agencies involved. The approach is based on the idea that aligning capital investment in key locations, and linking the capital investment with housing and employment and regeneration schemes, will produce more efficient strategies that better coordinate public and private spending in a place and create a more complete place.

We have identified 12 key localities that would benefit from a place-making approach due to their future housing and employment growth:

- Abingdon and Faringdon
- Banbury
- Bicester and Upper Heyford
- Botley
- Didcot
- Oxford
- Science Vale UK
- Thame and Chinnor
- Wallingford and Cholsey
- Wantage, Grove and Harwell
- West Oxfordshire strategic sites
- Rural housing sites across Cherwell, South Oxfordshire, Vale of White Horse and West Oxfordshire.

The commentary and diagrams on the following pages show the links between infrastructure, employment, housing and regeneration by location. We hope to persuade all stakeholders to channel capital funds through our place-making agenda.

1. Abingdon and Faringdon

The area of Abingdon and Faringdon in the Vale of White Horse District could deliver 959 homes over the next five years. Growth in this area comes from six housing-led schemes. These include:

- former nursery and cricket ground, Faringdon
- South of Park Road and Coxwell House, Faringdon
- Old Gaol, Abingdon
- two sites in Sutton Courtenay, and
- yet-to-be-identified sites, mainly in Abingdon and larger villages.

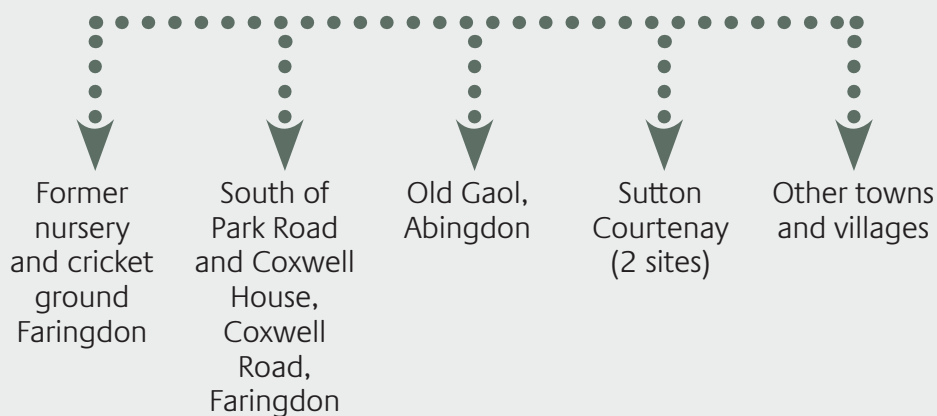

Three priority strategic infrastructure projects will be required in the short term. These include the expansion of primary-school provision at South of Park Road, Faringdon and a secondary school in Larkmead, Abingdon, as part of Building Schools for the Future. Improvements to Abingdon town centre include plans for public-realm and access improvements, such as a new health centre and library.

Strategic infrastructure

Abingdon and Faringdon

Schemes

Short Term 2010-2015	332 homes	135 homes	62 homes	30 homes	400 homes
Medium Term 2015-2020	0 homes	250 homes	0 homes	0 homes	400 homes
Long Term 2020-2030	0 homes	50 homes	0 homes	0 homes	400 homes
Total	332 homes	435 homes	62 homes	30 homes	1200 homes

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

2. Banbury

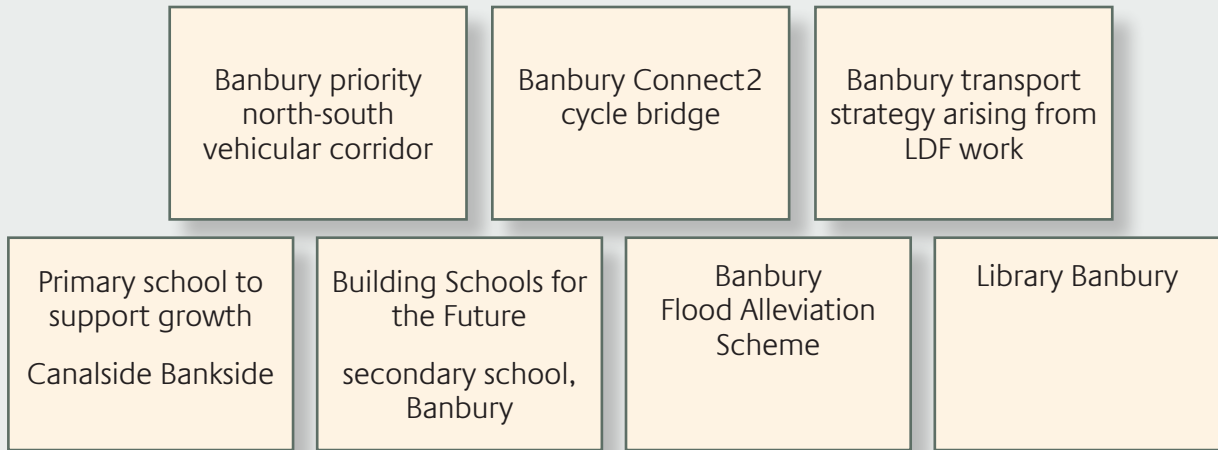

Banbury is the most northern major town in Oxfordshire and has major catchment areas in and links with other towns in Oxfordshire and across the county boundary. It also has strong links to the surrounding rural areas. Banbury has a well-defined local housing market area and economy with a distinct character. There is a focus on continued local growth and a strong emphasis on urban regeneration to tackle the cycle of deprivation and enhance the local economic and employment base.

Two priority growth schemes, the Bankside Urban Extension and the regeneration of Banbury Canalside, are deliverable in the short term. They combine housing and regeneration-led schemes.

These schemes could deliver 2,270 new homes in the first five years. The strategic infrastructure needed to deliver them includes:

- Banbury priority north-south vehicle corridor,
- Banbury Connect2 cycle bridge
- a new primary school as part of Banbury Canalside and Bankside Urban Extension
- a rebuilt/refurbished secondary school in Banbury as part of Building Schools for the Future
- a new library in Banbury, and
- the Banbury Flood Alleviation Scheme.

Strategic infrastructure

Banbury

Schemes

Short Term 2010-2015	1,70 homes	1,200 homes
Medium Term 2015-2020	400 homes	0 homes
Long Term 2020-2030	0 homes	0 homes
Total	1,470 homes	1,200 homes

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

3. Bicester and Upper Heyford

Bicester is highly accessible and relatively free of environmental restrictions, making it the primary growth area in Cherwell District. The future development of Bicester is based on continued expansion around Bicester to enhance the economic health of the Central Oxfordshire sub-region, which is a 'Diamond for Investment and Growth'. Much of the future growth in this area will be in North West Bicester, which has been identified as an eco town location, with plans for a sustainable development of 5,000 homes by 2030.

Bicester is a country town identified as a main focus of housing growth in successive structure plans. An increase in economic development and more new local jobs would now help improve its self containment and therefore its sustainability.

In the next five years, Bicester and Upper Heyford could deliver 3,825 homes through the following schemes:

- NW Bicester Eco-town
- SW Urban Extension
- Bicester Business Park
- former RAF Upper Heyford, and
- Gavray Drive.

These schemes represent a mix of employment and housing-led schemes, which aim to increase local employment, provide more housing, and reduce local commuting pressures.

The strategic infrastructure necessary to deliver these priority projects include a mix of transport, education and community facilities.

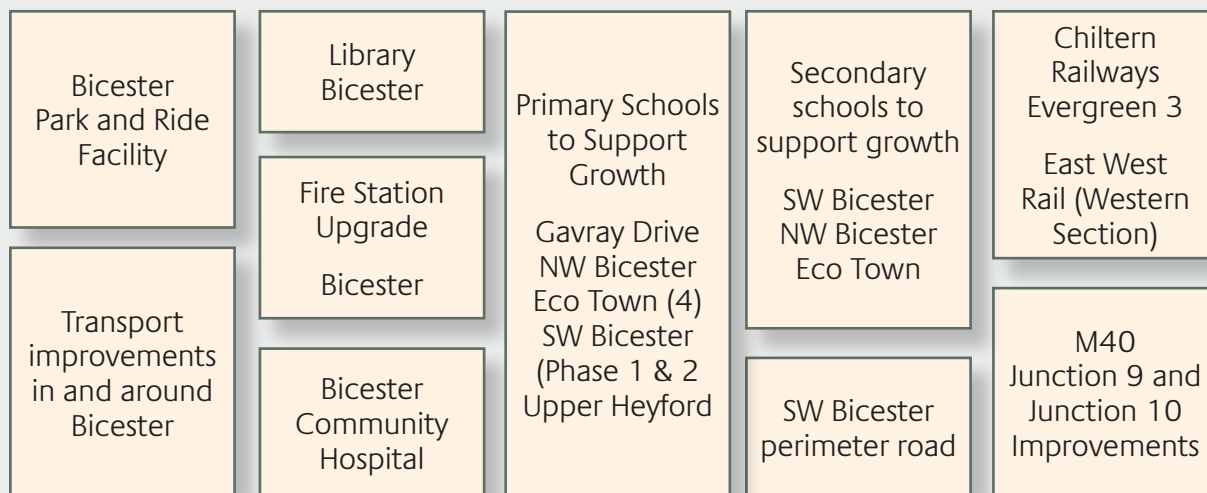

The transport infrastructure includes:

- Bicester Park and Ride
- improvements in and around Bicester including SW Bicester Perimeter Road
- M40 Junction 9 and Junction 10, and
- Chiltern Railways/Evergreen 3 Project (linked to East West Rail).

Additional infrastructure includes:

- new primary schools and secondary schools to support growth,
- improvements to Bicester Community Hospital
- a new library, and
- an upgrade to the fire station at Bicester.

Strategic infrastructure

Bicester and Upper Heyford

Schemes

Short Term 2010-2015	1,250 homes	1,000 homes	30,000 m ²	500 homes	1,075 homes
Medium Term 2015-2020	2,000 homes	585 homes	30,000 m ²	0 homes	0 homes
Long Term 2020-2030	1,750 homes	0 homes	0 m ²	0 homes	400 homes
Total	5,000 homes	1,585 homes	60,000 m²	500 homes	1,075 homes

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

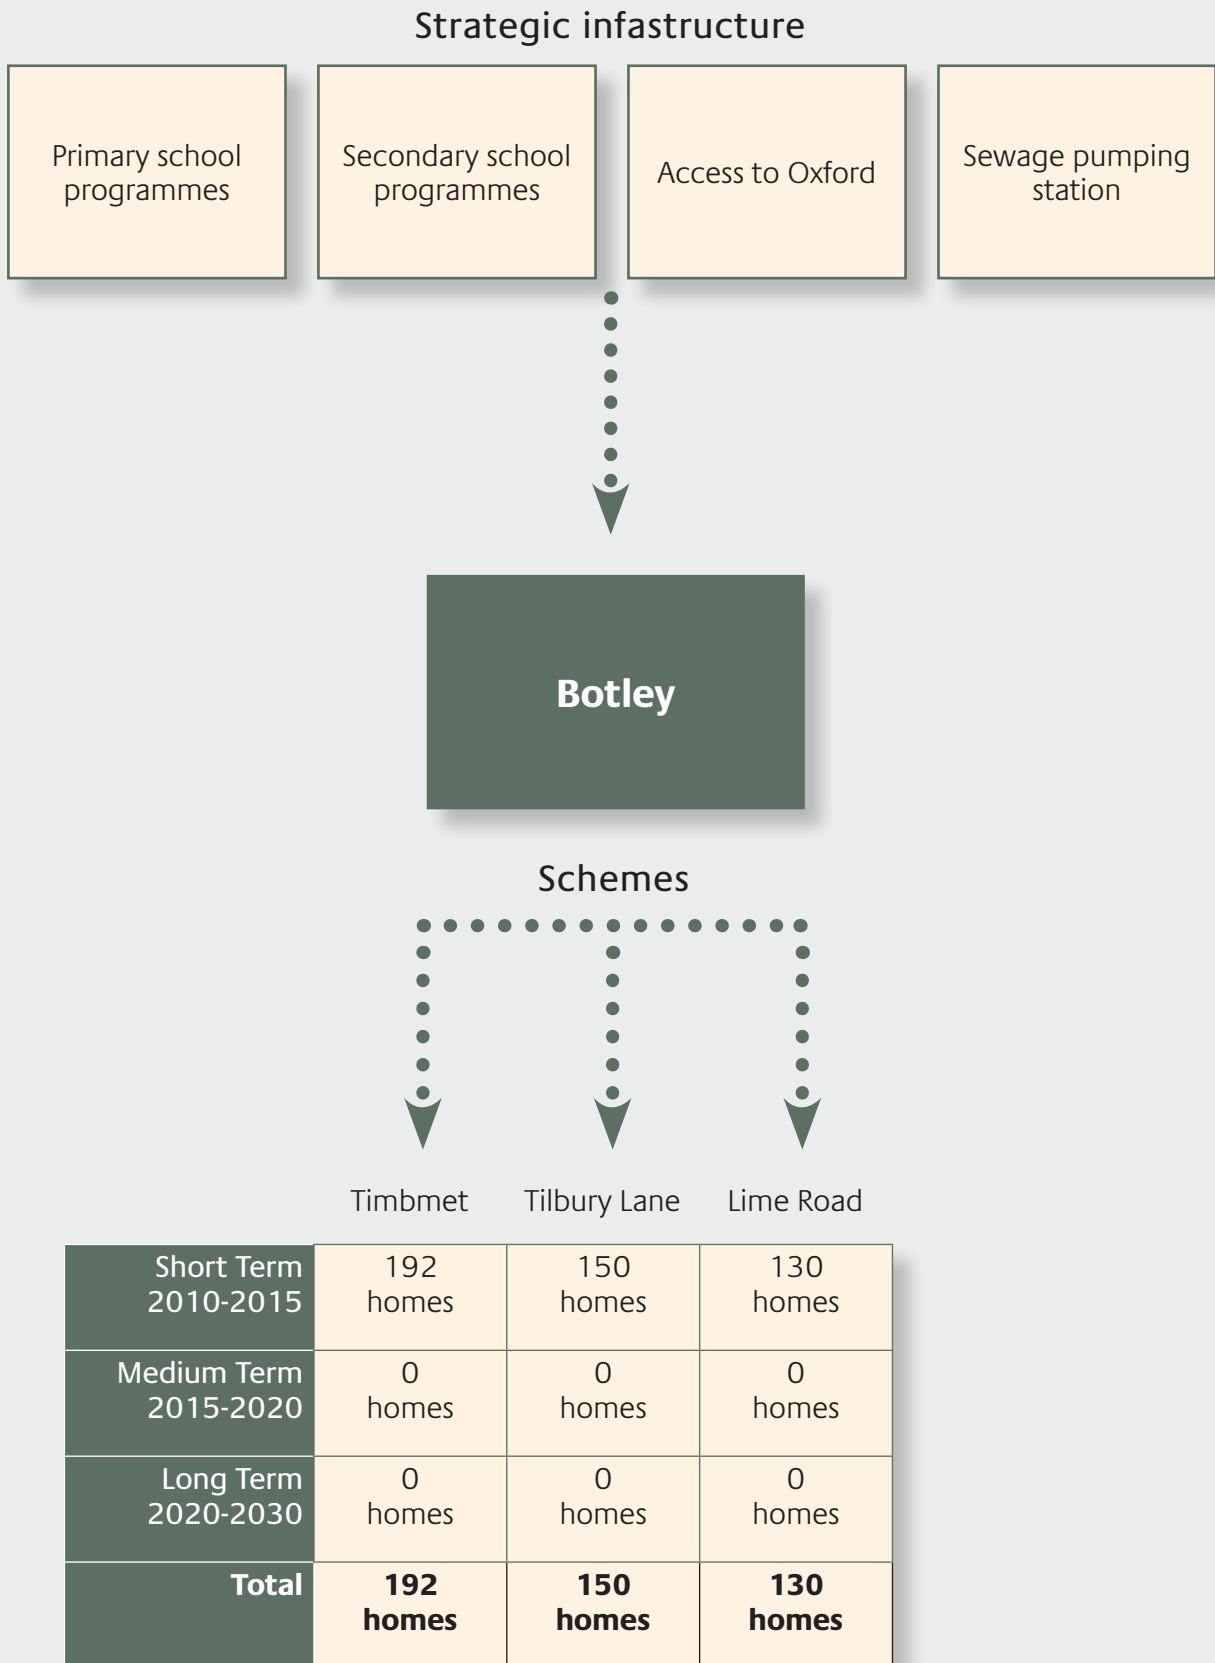

4. Botley

Botley is in the Vale of White Horse, to the west of Oxford. There are important employment, housing and infrastructure links between Botley and Oxford.

Three priority schemes have been identified in Botley. They include Lime Road, Tilbury Lane and Timbmet. Together, these housing-led schemes could deliver a total of 472 homes and 189 affordable homes in the first five years.

Currently all development in Botley is at a standstill, awaiting a sewage pumping station. Thames Water has programmed this work for 2012.

The strategic infrastructure identified to deliver these housing schemes includes primary and secondary school programmes and various transport improvements as they relate to Access to Oxford.

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

5. Didcot

Didcot has been identified as a country town in several successive structure plans, and has experienced rapid growth since the 1980s. It is one of Oxfordshire's two New Growth Point areas and it will deliver a further 8,750 homes by 2026. Didcot is at the centre of Science Vale UK (SVUK), one of the UK's biggest science growth areas. The provision of affordable housing and development of a thriving town centre at Didcot is central to the planned employment growth of the science parks in SVUK. A further phase of town-centre retail and leisure development is under way.

Didcot falls across the district boundary of South Oxfordshire and Vale of White Horse and for a number of years cross-boundary collaboration has brought housing growth.

Four housing-led schemes have been identified as priorities. They could deliver 2,000 homes over the next five years. They include Great Western Park (South), Great Western Park (Vale), Ladygrove East (South), and Didcot Northern Urban Extension (South).

Essential to the delivery of new housing and employment uses is the strategic infrastructure needed to support these schemes. Transport improvements include:

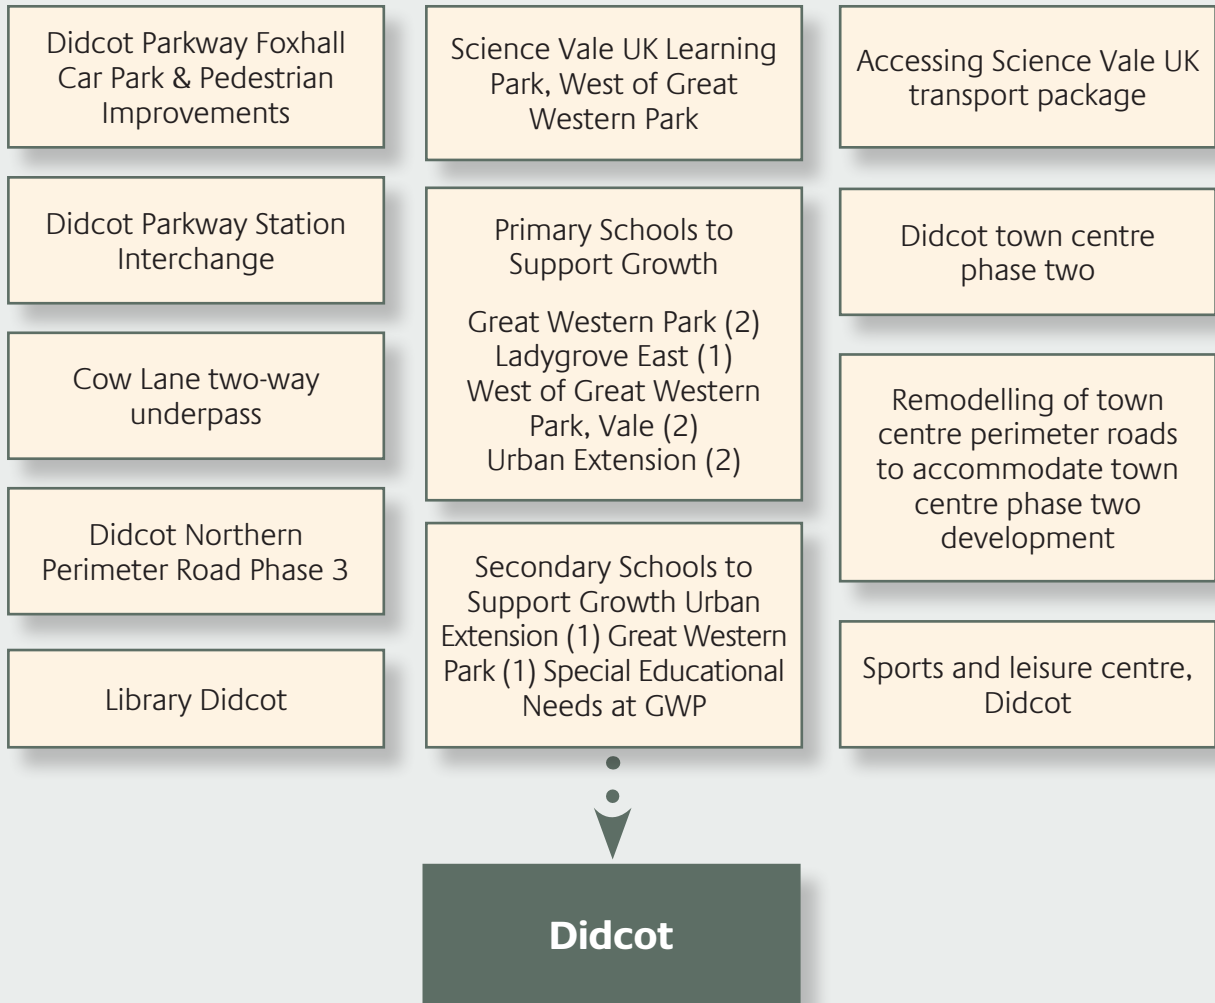

- Didcot Northern Perimeter Road Phase 3
- a new two-way underpass at Cow Lane to link the town and the northern development areas
- remodelling of Hitchcock way and roundabout as part of the town centre phase two development
- Didcot Parkway Station Interchange, and
- Didcot Parkway Foxhall Car Park and pedestrian improvements.

Accessing Science Value UK has identified the need for several strategic road, cycle and public transport schemes in the area to support the growth to 2026. This has led to a strategic infrastructure bid to the Regional Transport Board, titled 'Accessing Science Vale UK'. The SCOT study showed that this transport package is essential to Didcot's further housing growth.

Additionally, the town needs new primary and secondary schools to support growth, as well as a new sport and leisure centre and a new library.

Plans are being developed for a science-based learning park at Didcot to service the needs of growth businesses and to meet further education demands within SVUK. Five hectares of land is reserved for the learning park to the west of Didcot within the Vale of White Horse Local Development Framework Core Strategy.

Strategic infrastructure

Schemes

Short Term 2010-2015	700 homes	600 homes	300 homes	400 homes
Medium Term 2015-2020	1,250 homes	0 homes	342 homes	1,000 homes
Long Term 2020-2030	750 homes	0 homes	0 homes	400 homes
Total	2,700 homes	600 homes	642 homes	1,800 homes

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

6. Oxford

Oxford is the city at the heart of the Central Oxfordshire sub-region, and is one of two New Growth Points (NGPs) identified in Oxfordshire. Oxford and Central Oxfordshire sub-region has been identified as one of eight 'Diamonds for Investment and Growth'. As one of 21 regional hubs across the South East region, Oxford is a centre of economic activity and transport services, serving the needs of the wider region. These designations highlight Oxford's strategic importance in the delivery of housing, employment and regeneration.

Eight priority short-term deliverable growth schemes have been identified in Oxford. These include four housing-led schemes, one employment-led scheme and three regeneration schemes.

In the short term (by 2015), Oxford could deliver 4,810 homes, of which 2,167 would be affordable. This includes housing schemes at:

- Barton
- Blackbird and Greater Leys
- Oxford West End
- small and medium housing sites throughout Oxford, and
- the new council-house building programme.

Oxford West End Renaissance and the Northern Gateway site (subject to the outcome of the Oxford Core Strategy) could provide significant floor space and job opportunities, which will improve the county economy.

Oxford's adopted Regeneration Framework sets out an action plan covering the physical, social and economic activities needed for regeneration, and seeks to break the cycle of deprivation. There are regeneration schemes to address five areas in Oxford; Barton, Blackbird Leys, Oxford West End, Rose Hill and Wood Farm. In addition, various aim to tackle homelessness.

Eight pieces of strategic infrastructure have been identified to deliver the priority housing, employment and regeneration schemes. In transport, these are:

- Access to Oxford
- Chiltern Railway/Evergreen 3 proposal (which will deliver the first part of East West Rail), and
- Thornhill Park and Ride.

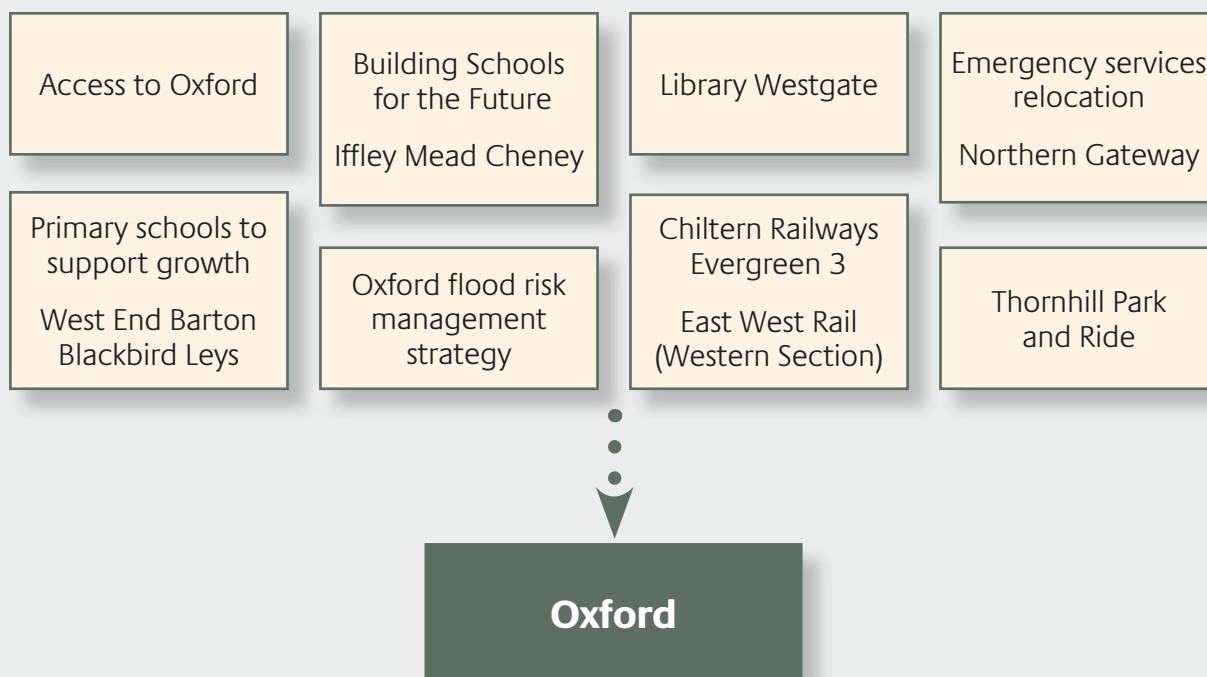

Educational infrastructure includes:

- new primary schools at Barton, Blackbird Leys and the West End
- improvements to the secondary schools at Iffley Mead and Cheney as part of Building Schools for the Future programme. The Oxford School may also enter the academies programme during this time frame.

The other main infrastructure projects are:

- the Oxford Flood Alleviation Scheme
- the relocation of emergency services to the Northern Gateway site, and
- the refurbishment of the Westgate library.

Strategic infrastructure

Schemes

Short Term 2010-2015	2,722 homes	830 homes	500 homes	n/a	500 homes	58 homes	200 homes	n/a
Medium Term 2015-2020	1,151 homes	35,000 m ²	500 homes	n/a	0 homes	0 homes	20,000 m ²	n/a
Long Term 2020-2030	1,900 homes	0 homes	0 homes	n/a	0 homes	0 homes	35,000 m ²	n/a
Total	5,773 homes	830 homes 35,000 m²	1,000 homes	n/a	500 homes	58 homes	200 homes 55,000 m²	n/a

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

7. Science Vale UK

Science Vale UK (SVUK) sits in the Oxford and Central Oxfordshire 'Diamond for Investment and Growth'. It includes the areas of Didcot, Wantage and Grove, Harwell Science and Innovation Campus (HSIC), Culham Science Centre, and Milton Park. [Didcot and the Wantage, Grove and Harwell conurbation are covered elsewhere as separate place-making localities.]

SVUK is an area of economic growth focused around enterprise and innovation. It includes a significant proportion of the region's scientific research and development and high technology businesses.

Harwell SIC has just under 70 ha of land earmarked for mixed-use development, including science and innovation, business, and residential uses. A further 24 ha of land could be used for business development in the period to 2020. An additional 100 ha has been earmarked for a mix of science, business and residential development from 2020. Milton Park is one of the largest business parks in Europe and is a cluster of knowledge-based businesses. It covers 77 ha of land and has 340,000 m² of floor space, employing more than 6,300 people.

Each of the areas which form SVUK has specific infrastructure needs, but the overarching infrastructure requirements for the whole of the SVUK area is the Accessing Science Value UK package, which includes a new railway station to serve Wantage and Grove.

Further plans include the roll-out of high-speed broadband across SVUK and the creation of an innovation learning park, which will address the learning and development needs of employees in all sorts of businesses as well as meeting the increasing demands for further education across SVUK.

Strategic infrastructure

Schemes

Science Vale UK

Short Term 2010-2015	70 ha
Medium Term 2015-2020	24 ha
Long Term 2020-2030	100 ha
Total	194 ha

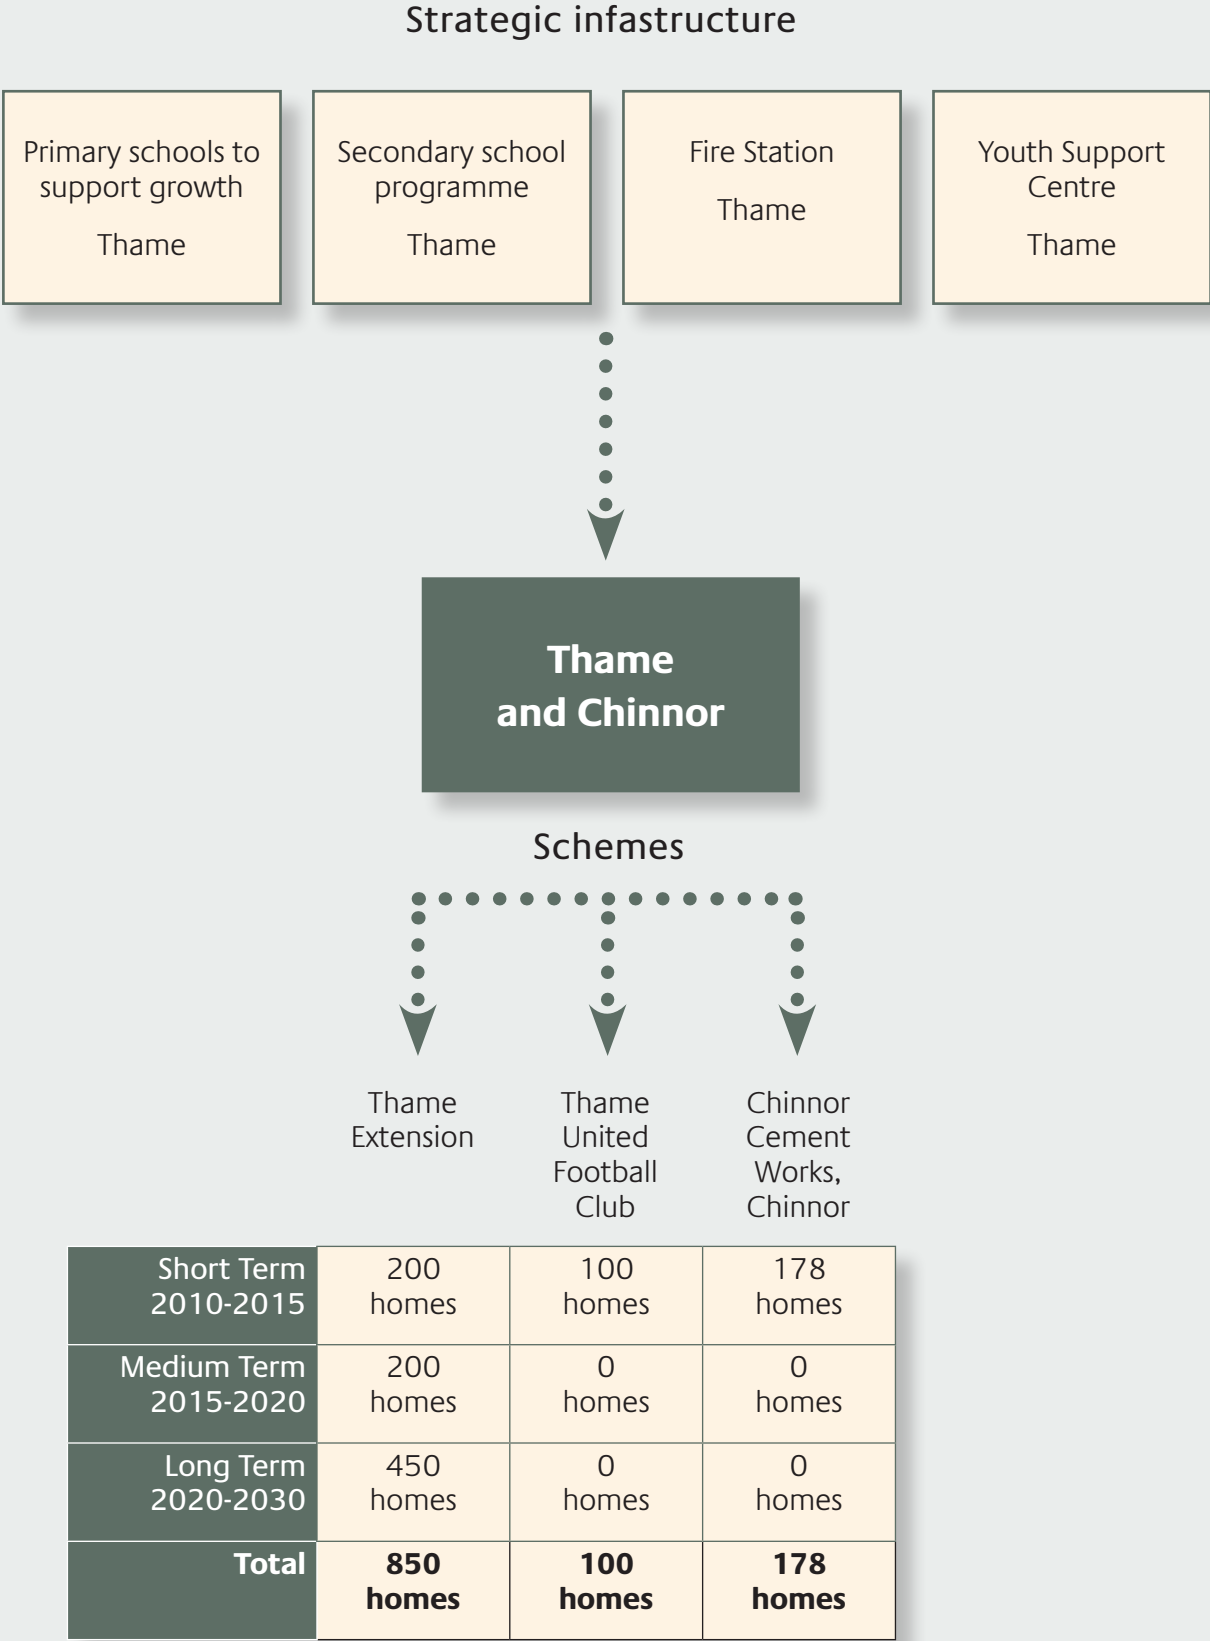

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

8. Thame and Chinnor

The Thame and Chinnor area could provide 478 homes in the next five years, and a total of 1,128 homes by 2030. This expansion would come from three housing-led schemes; the extension to Thame; the redevelopment of Thame United Football Club; and Chinnor Cement Works.

Four strategic pieces of infrastructure have been identified to ensure a rounded development within the larger area. These are (all in Thame):

- a new primary school
- a youth support centre
- secondary education provision, and
- a new fire station.

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

9. Wallingford and Cholsey

The area comprising Wallingford and Cholsey in South Oxfordshire could deliver a total of 603 new homes in the next five years and a total of 1,103 homes by 2030. Two priority housing schemes have been identified: Fair Mile Hospital and an extension to Wallingford.

Strategic pieces of infrastructure to support these housing-led schemes are new primary school and secondary school improvements, and a new fire station at Wallingford.

Strategic infrastructure

Wallingford and Cholsey

Schemes

Thame Extension

Thame United Football Club

Short Term 2010-2015	353 homes	250 homes
Medium Term 2015-2020	0 homes	250 homes
Long Term 2020-2030	0 homes	250 homes
Total	353 homes	750 homes

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

10. Wantage, Grove and Harwell

The towns of Wantage, Grove and Harwell form the western boundary for the Science Vale UK and both will be receiving major housing. The Local Plan already allocates Grove Airfield for 2,500 homes and the emerging Core Strategy is proposing to allocate a further 1,500 homes north-east of Wantage.

Major pieces of infrastructure include the Northern Link Road at Grove and the Wantage Eastern Link Road. Also included are a new secondary school, two or three primary schools, a new library, contributions to the Accessing Science Value UK package and improvements/replacement of Wantage Leisure Centre.

The area around the Harwell Campus could take an additional 550 homes in the next five years, and a total of 675 by 2020. This is made up of Chilton Fields, which has recently been granted planning permission; and the land north of the Campus, which is being proposed as a strategic site as part of the emerging Core Strategy.

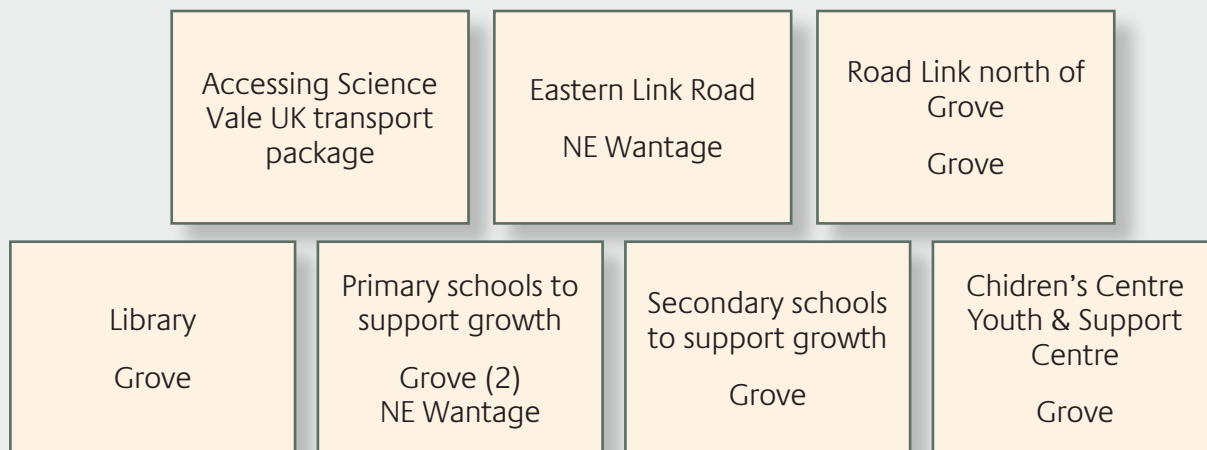

Taken together, the Wantage, Grove and Harwell area could deliver a total of 1,401 new homes in the next five years.

The strategic infrastructure to deliver these schemes includes the Accessing Science Value UK package. This covers road, rail, public transport and cycle schemes across the Wantage/Grove, Harwell and Didcot area.

Other infrastructure needs are:

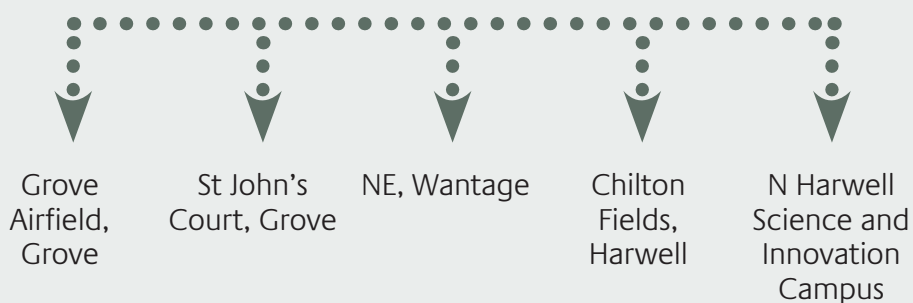

- the improvement/replacement of the Wantage Leisure Centre
- a new library at Grove, and
- new primary schools and secondary schools.

Strategic infrastructure

Wantage, Grove and Harwell

Schemes

Short Term 2010-2015	650 homes	11 homes	190 homes	275 homes	275 homes
Medium Term 2015-2020	1,250 homes	0 homes	600 homes	0 homes	125 homes
Long Term 2020-2030	600 homes	0 homes	710 homes	0 homes	0 homes
Total	2,500 homes	11 homes	1,500 homes	275 homes	400 homes

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

11. West Oxfordshire strategic sites

Significant growth is expected in the towns of Carterton, Chipping Norton, and Witney. Additionally, there are considerable development pressures and housing needs, particularly for rural housing and the elderly. Much of the planned future investment aims to improve and expand the existing infrastructure in towns as well as villages.

Witney, the largest town in West Oxfordshire, has expanded considerably over the last 20 years. Carterton, the next largest town, is also undergoing major expansion related to the redevelopment of the air transport base.

Five housing-led priority growth schemes have been identified in West Oxfordshire. Together, these schemes could deliver 1,400 homes in the first five years. The schemes include:

- Chipping Norton
- Northern Carterton
- West Witney/North Curbridge SDA
- Carterton Expansion, and
- various market-town schemes.

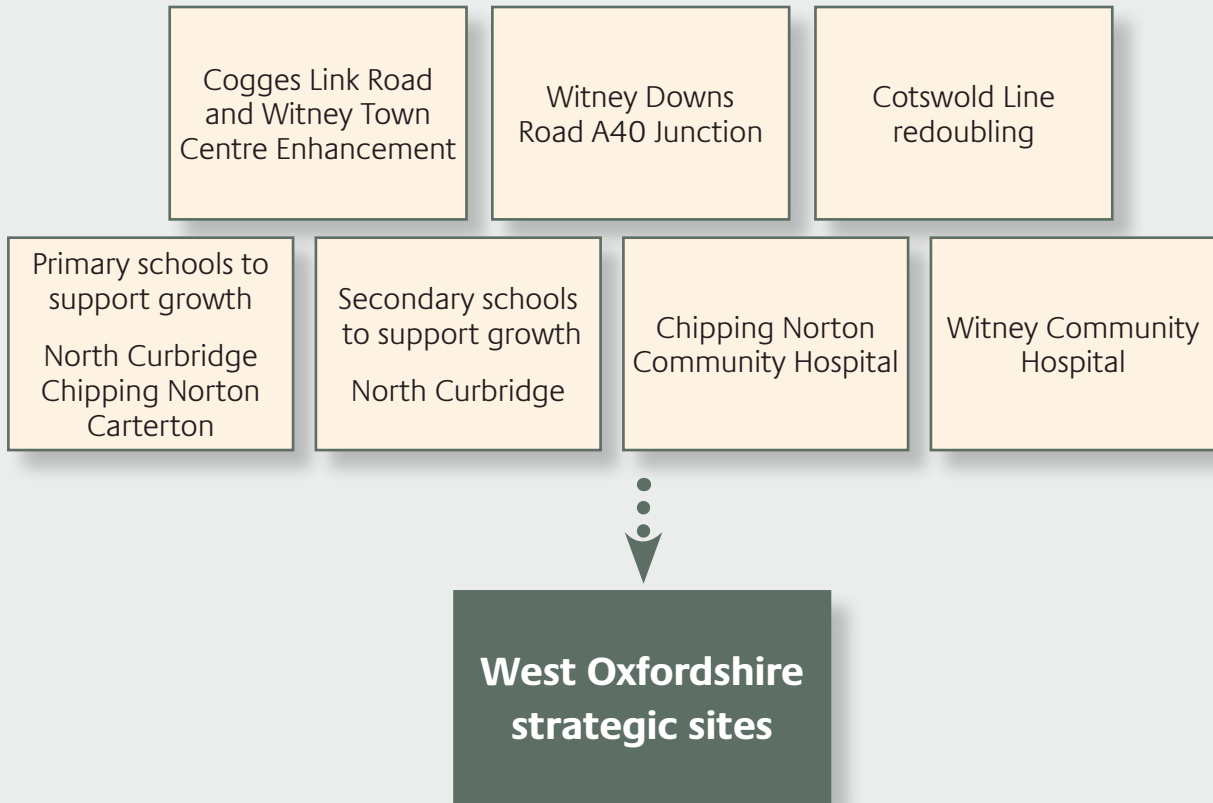

Seven pieces of strategic infrastructure have been identified to help deliver these housing schemes. The transport infrastructure includes:

- Cogges Link Road and Witney town-centre enhancement
- Witney Downs Road A40 Junction, and
- the Cotswold Railway Line Redoubling.

Also identified are:

- a new primary school at Chipping Norton
- a new primary and secondary school at North Curbridge ,and
- community hospitals in Chipping Norton and Witney.

Strategic infrastructure

Short Term 2010-2015	200 homes	200 homes	200 homes	300 homes	500 homes
Medium Term 2015-2020	0 homes	400 homes	0 homes	700 homes	500 homes
Long Term 2020-2030	0 homes	400 homes	0 homes	0 homes	1,000 homes
Total	200 homes	1,000 homes	200 homes	1,000 homes	2,000 homes

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

12. Rural housing

Almost half (49%) the population of Oxfordshire live in rural settlements, making Oxfordshire the most rural county in the South East region. The Oxfordshire Rural Housing Strategy (RHS) recognises 450 rural settlements in Oxfordshire, which accounts for about 19% of the rural settlements in the region.

While house prices vary significantly across Oxfordshire, there is strong evidence of high prices in many rural parishes, and affordability is a key concern. The supply of affordable housing in rural areas is limited because not many properties are coming onto the market. As a result, there is a lack of accommodation for newly forming households wishing to live in rural settlements, and many young people are leaving rural areas.

Many small villages are becoming exclusive communities of retired people and wealthy commuters. The loss of services, schools and shops in rural areas contributes to longer commute times and places a toll on the local economy. For this reason Oxfordshire County Council's primary Strategy for Change reaffirms its commitment to keeping local schools. There are no proposals for the closure of rural primary schools.

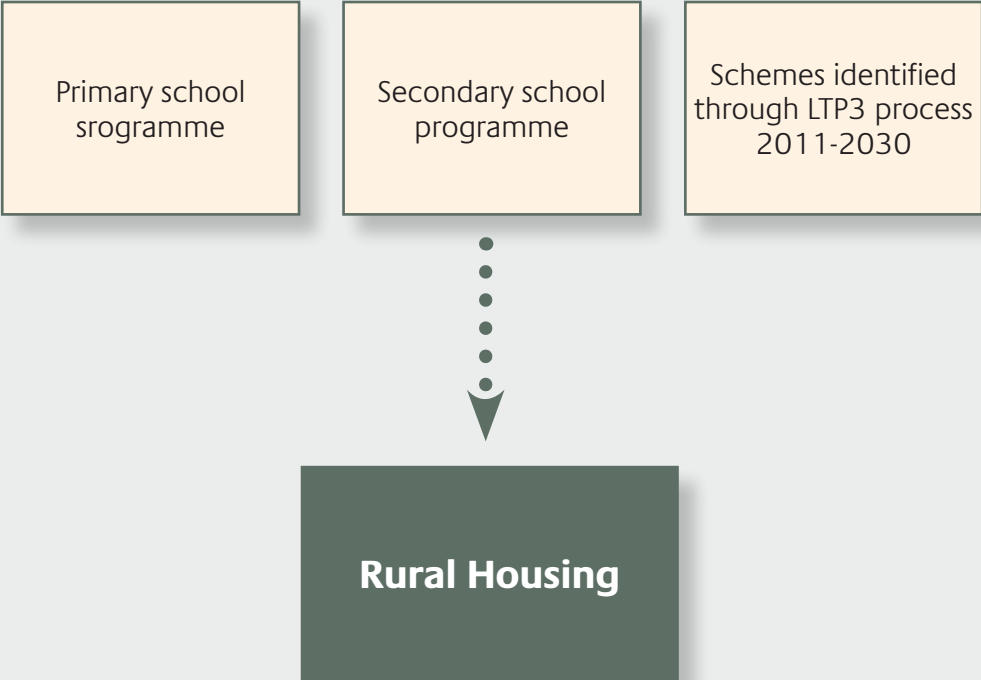

The RHS aims to promote sustainable communities in the rural areas of Oxfordshire; prevent the decline of local services; and enhance community life. It recognises the importance of market towns in delivering sustainable, thriving local communities.

The population of Oxfordshire is getting older, and the proportion of people aged 65 or older is expected to grow. This growth is substantial in the rural districts and will have implications for the type of housing and services that will be needed. It will be important to provide appropriate housing and support for the elderly in rural areas, to enable them to remain independent or live in homely environments in the community for as long as possible.

Cherwell, South Oxfordshire, Vale of White Horse and West Oxfordshire have identified rural housing schemes. Taken together, the schemes in these four districts are expected to deliver 1,498 homes within the next five years.

Because these schemes are not site specific, it is difficult to identify the specific strategic infrastructure they will need. In general, they will use existing transport and education infrastructure, but the plans will be re-examined as the development programme progresses and the Local Development Frameworks are finalised.

Strategic infrastructure

Schemes

	Cherwell	South	West	Vale
Short Term 2010-2015	275 homes	120 homes	603 homes	500 homes
Medium Term 2015-2020	80 homes	100 homes	400 homes	100 homes
Long Term 2020-2030	160 homes	200 homes	800 homes	200 homes
Total	515 homes	420 homes	1,803 homes	800 homes

Numbers do not include windfalls on unidentified sites

This is not an exhaustive list. There may be other strategic infrastructure and partners involved

Part 4: Next steps

Delivering the LIP

Local Investment Agreement (LIA)

The Local Investment Agreement (LIA) flows from the LIP and is a non-legally binding Memorandum of Understanding between the local authorities and the HCA about the investments and resources that they will provide. The LIA seeks to give certainty to all parties in preparing schemes and interventions. The LIA will also complete the analysis of the different funding streams available.

The LIA will be prepared by SPIP, but by its nature it also needs to be formally agreed by each local authority. The LIA should be completed by the end of June 2010.

The SPIP will consider using a similar format for agreements with other funding and delivery partners to ensure they formally commit to investing in Oxfordshire.

Monitoring

The success of any plan is proved by monitoring its impact. Monitoring, in turn, leads to assessing when and to what degree the plan needs to be reviewed. Each local authority is already responsible for monitoring issues relating to house-building, the number of new affordable homes, and employment floor space, through the annual monitoring report, which relates to the Local Development Framework. SPIP will use this information, as well as other context, to assess the LIP's success as part of this established cycle.

Reviewing

The LIP is an evolving document, and the SPIP will be able to review and if necessary

update it to reflect changing circumstances. At the same time, it needs to have a long enough 'shelf life' so that key partners can rely on it to inform their investment decisions. We expect to review, and if necessary update, the LIP every 18 months.

Informing Oxfordshire programmes

The LIP will be used to inform work in the following areas.

Local Development Frameworks

Each district is responsible for producing a portfolio of documents to guide its future spatial planning, known collectively as the Local Development Framework (LDF). The LIP sets out a shared vision and identifies strategic objectives for Oxfordshire, which the five LDFs will help deliver.

LTP3

The third Local Transport Plan (LTP3) for Oxfordshire is currently being developed. Unlike the previous two documents, which had to be short-term bidding documents for regional transport funding, LTP3 takes a long-term view to 2030. LTP3 will seek to quantify the investment required for the highway and transport infrastructure that will support the planned growth; and will bid for public funding.

The key issue in the emerging LTP3 is the need to secure transport investment, which will enable development to go ahead, support the growth and competitiveness of the local economy, and make it easier to get around the county, while reducing the impact of transport on the environment, tackling climate change, and promoting

healthy, safe and sustainable travel.

The LIP will support SPIP in informing and testing LTP3 as it progresses through crucial consultation stages.

Community Infrastructure Levy

The LIP will be vital in informing SPIP members' individual and collective thinking on the transition from Section 106 agreements to the new Community Infrastructure Levy (CIL).

SPIP has agreed to use the Local Investment Plan (LIP) and Local Investment Agreement (LIA) as a basis for advising the local planning authorities on development-related infrastructure needed by local government (particularly County Council) services; and by other providers. This advice will help local planning authorities decide on infrastructure planning in their LDFs and on whether to introduce CIL or other ways of getting contributions from developments.

Oxfordshire Economic Strategy

The LIP will be an important document in informing and testing the future Oxfordshire Economic Strategy, which SPIP is also responsible for. This LIP has been prepared in parallel with the County Council's Oxfordshire Economic Assessment (EA). The LIP and the EA will inform the issues that need to be addressed in the Economic Strategy.

South East Regional Strategy

The LIP will inform the production of the South East Regional Strategy by the South East England Partnership Board (SEEPB). The new document will replace the adopted South East Plan (Regional Spatial Strategy) and the Regional Economic Strategy, and will cover the period to 2031. This LIP, with its agreed shared visions, strategic objectives, and housing, employment and

regeneration schemes, will seek to inform the direction and content of this South East Regional Strategy as far as it relates to Oxfordshire.

Total Place/Total Capital

Total Place looks at how a 'whole-area' approach to public services and investments can lead to better outcomes. It seeks to identify and avoid overlap and duplication between organisations, so improving local services and efficiency. Through the LIP, we have started to apply our place-making approach to 12 locations across Oxfordshire. This could develop into a formal 'Total Place/Total Capital' approach, which could help deliver housing, employment, and regeneration schemes throughout the county.

Formal adoption

The local authorities and the Homes and Communities Agency (HCA) formally sign up to the contents of this Local Investment Plan as part of the 'Single Conversation', and in advance of the Local Investment Agreement, which will be signed and sealed with the HCA in due course.

We are clear that the success of this LIP depends on the actions of ourselves and all our partners, and that we will seek to work together to achieve the growth we have outlined here.

On behalf of our individual organisations, working together within the Oxfordshire Strategic Planning and Infrastructure Partnership, we formally adopt this document.

Councillor Barry Wood

Leader, Cherwell District Council

Councillor Bob Price

Leader, Oxford City Council

Councillor Ian Hudspeth

Portfolio Holder for Growth and
Infrastructure, Oxfordshire County Council

Councillor Ann Ducker

Leader, South Oxfordshire District Council

Councillor Tony de Vere

Leader, Vale of White Horse District Council

Councillor Barry Norton

Leader, West Oxfordshire District Council

David Edwards

Homes and Communities Agency

The LIP will be held by SPIP and the HCA.
The HCA will formally seal this document. It
will be publicly accessible through the local
authorities' and HCA websites.

Date: 31 March 2010

Appendix 1: SPIP Membership and Governance

The Oxfordshire Strategic Planning and Infrastructure Partnership Board (SPIP) is a forum for liaison and information sharing on matters of mutual interest. SPIP operates by member consensus, using consensus views to advise and influence the relevant local, regional and national decision-making bodies. Through consensus, SPIP is accountable to the Oxfordshire Partnership Board and Public Service Board.

The Oxfordshire Partnership Board sets out the long-term strategy for Oxfordshire via the Oxfordshire 2030 Strategy. The Partnership Board comprises the local authority leaders as well as representatives from private, voluntary and other public-sector interests. While the Oxfordshire Partnership does not have formal sign-off responsibilities, it has a role in considering and commenting on priorities as they emerge.

The Public Service Board is responsible for monitoring Oxfordshire's Local Area Agreement (LAA) targets on behalf of the Oxfordshire Partnership.

SPIP comprises members of the local authorities, and representatives from partners including SEEDA, GOSE, the Homes and Communities Agency (HCA), Highways Agency (HA), and the Oxfordshire Primary Care Trust (PCT). The SPIP Partnership Board is responsible for steering the Single Conversation process, and is mainly responsible for ensuring that the Local Area Agreement (LAA) targets are delivered. The LAA targets include:

- NI 154 – increase in net additional homes
- NI 155 – number of affordable homes delivered (gross)
- NI 175 – increase access to services and facilities by public transport, walking and cycling

- NI 156 – reduce the number of households living in temporary accommodation.

The SPIP Executive consists of senior officers from the five member authorities, the HCA and other partners. The SPIP Executive is responsible for overseeing the contents and development of the LIP and the LIA.

Aim and objectives

SPIP has the following aims and objectives:

- To provide a liaison forum on spatial planning, economic development, housing, transport, and general infrastructure issues arising at regional and sub-regional level.
- To lead and co ordinate the Homes and Communities Agency (HCA) 'single conversation' process on regeneration and housing issues and contribute to any related interaction with government agencies.
- To be accountable for the delivery of LAA targets for which the partnership has taken responsibility.
- To advise partners on matters of collective interest in the fields of activity listed above.
- To seek agreement on local priorities and targets in the fields of activity listed above.
- To seek agreement on alignment between national, regional and local funding streams in the fields of activity listed above.
- To ensure that regional policy development, the Local Transport Plan and joint working through the Oxfordshire Partnership and District Local Strategic Partnerships on service planning and community development are appropriately linked to the decision-making role of the local planning authorities on Local Development Frameworks and related infrastructure planning.
- To assist in making detailed arrangements for integration between spatial, infrastructure and public-service planning in defined localities.

Purpose

Specifically, SPIP will:

- share information and analysis on spatial planning, economic development, housing, transport, and general infrastructure issues at regional and sub-regional level
- share information and analysis on cross-administrative boundary spatial planning, economic development, housing, transport, and general infrastructure issues, including in areas adjoining the regional boundary
- monitor, consider and advise on partner progress and delivery against any Local Area Agreements or similar arrangements with government – including relevant national and local targets
- develop and communicate consensus views that seek to inform, assist and influence government, government agency and regional institutions/bodies in their policy formulation and decision-making roles
- develop and communicate consensus views that seek to inform, assist and influence sub-regional and local agencies that operate across local authority administrative boundaries
- advise partners concerned with economic development, housing, transport, and funding or providing general infrastructure on how to contribute appropriate research, policy and resource input to the statutory Local Development Framework process
- link to the work of the Oxfordshire Housing Partnership (housing authority led) and commission work that promotes co-operation between partners on housing
- link to the work of the Oxfordshire Economic Partnership (business led) and commission the planning and delivery of economic assessment work that promotes co-operation between partners on economic development.

Accountability and working methods

SPIP operates by member consensus. Through that consensus it is accountable to the Oxfordshire Partnership and Public Service Board and to constituent District Local Strategic Partnerships and all the organisations that belong to those partnerships.

SPIP will report to the Public Services Board on its progress in delivery of any agreed objectives.

SPIP will be assisted in achieving agreed objectives by the following delivery bodies/agents:

• Economic development

Oxfordshire Economic Partnership (OEP), through its Board of Directors and their core development group.

SPIP will work closely with OEP and co-operate on delivery priorities and funding and other issues of mutual interest.

The local authority representatives on the OEP Board/core development group (1 county/2 district) are charged with maintaining co-ordination and co-operation on delivery tasks and reporting back through SPIP on OEP plans/progress.

• Housing

Oxfordshire Housing Partnership (OHP), through its officer steering group (led by district council housing authority departments rotating in alphabetical order).

After the creation of SPIP, OHP will operate mainly at local authority officer and agency official level. Local authority member involvement will be through Oxfordshire Housing Partnership 'Forum' meetings held at roughly six-monthly intervals and designed to engage a wide range of private, voluntary and RSL-sector partners in the housing field.

- **Transport/access to services**

Oxfordshire County Council through its officer-level joint working arrangements on transport.

SPIP will receive reports on and provide input to the Oxfordshire Local Transport Plan. There will be a strong reporting and delivery link to transport planning studies and projects developed for specific localities to feed into district-led (local planning authority) work on LDFs.

- **Spatial and infrastructure planning**

District councils and district LSPs working through LDFs, supported by the Oxfordshire Chief Planning Officers Group to pick up common and cross-boundary issues.

Partnership principles

SPIP is set up as a 'thematic partnership' under the Oxfordshire Partnership Governance arrangements. It is committed to working to the general principles and procedures established by the Oxfordshire Partnership (summarised below with specific reference to the role of SPIP):

- Visible commitment and 'ownership' by the various member organisations and individual representatives
- Mutual trust and respect
- Openness and transparency
- Effective communication and accountability
- Removal of barriers to equality of access and opportunity
- Effective decision making.

SPIP is a forum for liaison and information sharing and the development of consensus on matters of mutual interest.

Consensus will be used to advise and influence the relevant decision-making bodies, including:

- government and its agents (including Government Office for the SE)
- national agencies, particularly Homes and Communities Agency and Highways Agency
- the Regional Planning Body and other regional level bodies/agencies (through the region-wide local authority co-ordination systems as established to prepare the Integrated Regional Strategy)
- the district councils as local planning authorities
- the district councils as housing authorities
- the County Council as highway authority
- the County and district councils as general service providers
- the district LSPs (as the primary locality-based co-ordinating partnership)
- the Oxfordshire Economic Partnership (business led)
- other infrastructure and service-providing bodies and partnerships that are affected by, and can influence, local economic development, housing, transport, general infrastructure and spatial planning activity.

SPIP will work closely with other Oxfordshire-based partnerships where there are cross-over issues. It will work with district LSPs and other locality-based partnerships where a more detailed level of partnership working is appropriate on areas covered by the terms of reference.

Composition of the Spatial Planning and Infrastructure Partnership

Partnership lead and chairman		
Local authorities take the roles of chairman and vice chairman on an annual rotation.		
Year	Chairman	Vice chairman
2009/10	Cherwell District Council	Oxfordshire County Council
2010/11	Oxfordshire rural housing schemes	Oxford City Council
2011/12	Wantage, Grove and Harwell (part of Science Vale UK)	South Oxfordshire District Council
2012/13	NW Bicester Eco Town, Bicester	Vale of White Horse District Council
2013/14	Banbury Canalside, Banbury	West Oxfordshire District Council
2014/15	West Oxfordshire District Council	Cherwell District Council

Core members	
Leader or other cabinet/ executive member from leach local authority	Councillor Barry Wood, Cherwell District Council Councillor Bob Price, Oxford City Council Councillor Ian Hudspeth , Oxfordshire County Council Councillor Ann Ducker, South Oxfordshire District Council Councillor Barry Norton, West Oxfordshire District Council Councillor Tony de Vere, Vale of White Horse District
Government Office of the South East (GOSE); locality manager	Chris Farthing
South East England Development Agency (SEEDA)	Warren Ralls
Homes and Communities Agency (HCA)	David Edwards
Member representative Oxfordshire Housing Partnership (nominated by OHP lead council)	Councillor Angela Lawrence

Invitees	
Environment Agency (EA)	Rosemary Redmond
Highways Agency (HA)	Paul Robinson
Natural England (NE)	Charlotte Frizzell
Oxfordshire Economic Partnership, Chief Executive	David Doughty
Oxfordshire Environment and Waste Partnership, Chairman	Councillor John Tanner
Oxfordshire Primary Care Trust (OPCT)	Catherine Mountford
Regional Planning Body representative (SEEPB)	Catriona Riddell
Thames Valley Police (TVP): Area Commander for Oxfordshire	Brendan O'Dowda

Supporting officers	
Local authority – 1 nominated senior officer	Mary Harpley, Cherwell District Council Mel Barrett, Oxford City Council Huw Jones, Oxfordshire County Council Andrew Tucker, West Oxfordshire District Council Anna Robinson, South Oxfordshire District Council, Vale of the White Horse District Council
Project Manager, Single Conversation	Mark Jaggard, Oxford City Council

Appendix 2 Oxfordshire and District Visions

Oxfordshire

The Oxfordshire Partnership sets out in Oxfordshire 2030 (Oxfordshire's Sustainable Community Strategy) four strategic objectives for Oxfordshire:

- Create a world-class economy for Oxfordshire, building particularly on the high tech sector.
- Have healthy and thriving communities to sustain what is good about the city, towns and villages but also respond to the needs of the 21st century, including the impact of demographic and lifestyle changes.
- Look after the environment and respond to the threat of climate change and the potential for more extreme weather conditions, particularly the threat of flooding.
- Break the cycle of deprivation by addressing the regeneration needs of disadvantaged communities; reducing the gap between the best and worst off and supporting people to maximise their talents and raise their aspirations.

The Oxfordshire 2030 Delivery Plan includes the 35 targets chosen for the Local Area Agreement, covering: children and young people, skills and work, safer communities, housing, transport, adult health and well-being, climate change, a clean and green environment, volunteering, and value for money.

Oxfordshire County Council's corporate plan has four strategic objectives that broadly reflect those in Oxfordshire 2030. The following are the key priorities:

- World-class economy:
 - Improve the county's infrastructure.
 - Reduce traffic congestion.
 - Improve educational achievement.
 - Help young people get into – and stay in employment.
 - Improve skills levels to support the needs of local businesses.
- Healthy and thriving communities:
 - Reduce health inequalities.
 - Support older people and people with learning difficulties to live independently where possible.
 - Reduce anti-social behaviour.
 - Support community self-help.
 - Give particular attention to 14 areas of the county facing development or regeneration pressures.
- Environment and climate change:
 - Reduce the Council's CO₂ emissions and increase energy efficiency.
 - Support local communities to prevent and mitigate the effects of flooding.
 - Work with partners to increase recycling and composting and invest in new waste disposal facilities.
- Better public services:
 - Keep council tax low.
 - Work closely with our partners to reduce in efficiency and duplication.
 - Improve customer service.

Oxfordshire Partnership Local Area Agreement 2008-11 (Refresh March 2009). The Delivery Plan sets out the targets and actions identified to meet the strategic objectives and how they will be monitored.

Cherwell

The Cherwell Sustainable Community Strategy sets out the vision for the District. By 2030, Cherwell is envisaged as a district with the following characteristics:

- More prosperous than it is today. Those who live and work in Cherwell will be happier, healthier and feel safer with high aspirations and expectations. People will feel they belong here and diversity will be celebrated. Everyone will share in a better quality of life.
- Where older people will lead independent and healthy lives for longer with access to excellent services. Young people will have high personal aspirations, satisfied by a wide variety of local opportunities to achieve appropriate skills, qualifications and jobs.
- Where the quality of the natural and built environment will be protected and enhanced. Appropriate environmental technologies will be embraced and behaviour adapted to meet the global challenge of climate change.
- Where the economy will be vibrant and diverse; and local people will be skilled and able to access good jobs. The economy will have grown to provide employment for our increasing population and reduce the need for our residents to travel outside the district to work.
- Where the vitality of urban centres as economic, cultural and social hubs will be maintained, offering improved leisure and shopping facilities as well as a diverse and vibrant economy. Villages will be 'lived in' as well as 'slept in', helping to sustain a rural way of life with an economic base that does not rely entirely on agriculture.
- Where there will be many more homes with particular attention to both quality and affordability. Careful infrastructure investment will increase the capacity of existing communities and address current deficiencies in provision. Road congestion will be managed by encouraging less car use, increasing cycle paths and improving public transport.

Oxford

The Oxford Strategic Partnership's Sustainable Community Strategy envisages Oxford as a world-class city for everyone. The Oxford Strategic Partnership aims to tackle inequalities and to develop better lives for Oxford's citizens by:

- developing the local economy and the skills of our citizens, so as to increase the proportion of higher-paid jobs
- working together to constantly raise environmental standards and to move steadily towards a low-carbon economy
- sustainable housing for all our citizens
- working together to reduce the health, education and income inequalities in Oxford
- enhancing our residential and shopping areas to make the city healthier and greener, as well safe and well integrated for all
- developing partnerships between public, voluntary, and private organisations to research, test and improve practical solutions to the climate change crisis and the rising costs of energy
- developing a sustainable transport infrastructure
- building on the strengths of the city in education, business, culture and retailing to strengthen high-value tourism and the conference market.

Oxford Strategic Partnership's priorities are:

- strengthening the local economy
- tackling the need for more affordable housing
- improving health and social welfare
- tackling climate change
- improving the public realm for residents and visitors
- building a safer, stronger and more equal city.

The Partnership has recently adopted the Oxford Regeneration Framework as an addendum to its Sustainable Community Strategy, which integrates a range of themes and actions.

Oxford City Council's Corporate Plan identifies six corporate priorities that will drive the aspiration to be a world-class council in a world-class city:

- more housing and better housing for all
- tackle inequalities and supporting communities
- improve the local environment, economy and quality of life
- reduce crime and anti-social behaviour
- tackle climate change and promote environmental resource management
- transform Oxford City Council by improving value for money and service performance.

South Oxfordshire

The South Oxfordshire Sustainable Community Strategy vision for South Oxfordshire is an attractive, successful, vibrant and safe place where people choose to live, work and visit. It will be a place where everyone can enjoy:

- a good quality of life
- a strong sense of community where diversity in people and place is respected and valued
- access to services and facilities they need to support health and social and economic well being.

The strategy aims to achieve the vision for South Oxfordshire through the following priorities:

- Economy
- Environment
- Thriving communities'

The South Oxfordshire Corporate Plan 2008-2012 sets out the Council's strategic objectives and corporate priorities. The eight strategic objectives include:

- managing business effectively
- protecting the environment
- delivering homes for all
- supporting economic growth
- transforming Didcot
- helping people feel safe and secure
- improving opportunities, activities and support for young people
- strengthening local communities.

Vale of White Horse

In the Vale's Community Strategy the priorities for action are as follows:

- Social progress which recognises the needs of everyone
 - healthier communities
 - improving quality of life for older people
 - safer communities
 - fostering a greater sense of community
 - a good understanding of town and parish priorities
 - involving young people
 - helping those without cars to access jobs and services
 - affordable homes
 - good quality homes
 - access to good-quality green spaces, sport, cultural and leisure facilities.
- Maintenance of high and stable levels of economic growth and employment
 - addressing economic weaknesses
 - building on our economic strengths
 - maintaining and enhancing the health and vitality of the Vale's market-town centres.

- Effective protection of the environment and wise use of natural resources
 - a low-carbon Vale
 - living with extreme weather conditions
 - using resources wisely
 - reducing waste and increasing recycling
 - a high-quality natural and historic environment.

The Vale District Council's corporate objectives are:

- meeting people's need for housing
- supporting a vibrant local economy
- managing our business effectively
- rising to the challenge of climate change
- helping to maintain a safe Vale
- keeping the Vale a clean place to live.

West Oxfordshire

'Shaping Futures – A Sustainable Community Strategy for West Oxfordshire' sets out a shared ten-year vision. The nine priorities for action which are reflected in the overall vision set out through the Local Development Framework are to:

- keep towns and villages economically prosperous and vibrant
- tackle the specific challenges of accessing services and facilities
- help young people to move from childhood to adulthood
- support individuals and young families who want to stay in the area where they grew up
- support older people to maintain their independence and health
- maintain and improve the health and well-being of all residents in West Oxfordshire
- reduce crime and anti-social behaviour and the fear of crime across the district

to improve the quality of life in our neighbourhoods

- keep West Oxfordshire clean and beautiful while protecting the environment and trying to reduce the causes of and effects of climate change
- campaign to improve the transport infrastructure.

The West Oxfordshire Strategic Partnership's vision for the future is to meet the needs of West Oxfordshire's communities without significant change to the intrinsic character of the district.

The Partnership wishes the District to continue to be one of the best places in which to live, work, play and visit. It envisions a network of safe, inclusive, vibrant and prosperous market towns and villages within a healthy and attractive environment, where new development will respect and complement the distinctive character of the area whilst managing the impact of climate change.

Current planning policy is contained in the adopted West Oxfordshire Local Plan 2011. The saved local plan policies form part of the Local Development Framework (LDF).

The LDF Core Strategy is at consultation stage. The Core Strategy Preferred Approach was published for consultation in February 2010. Submission of the Core Strategy is scheduled for October 2010. The latest Local Development Scheme (LDS) was published in September 2009.

Appendix 3: Prioritisation criteria

Each local authority has identified schemes that are deliverable in the first five-year period (2010–15). Currently there is a lack of clarity about the amount of funding available to the HCA over this period, due in part to the lack of a Comprehensive Spending Review (CSR). But, to a greater or lesser degree, the process will require priorities to be set.

The local authorities and the HCA have developed the following assessment process to come up with the lists of priority projects. The SPIP Full Partnership has endorsed the process set out below.

Criteria for prioritisation of projects to be included in the Local Investment Plan

For inclusion in the list a positive assessment is required on the following criteria:

A) Deliverability

1. Likely to start within five years
2. Planning problems can be overcome (including grant of outline planning permission).
3. Viability problems (including land ownership and assembly) can be overcome.

B) Strategic fit (from priorities in the emerging draft LIP endorsed by SPIP in December 2009)

1. Supports economic growth.
2. Delivers new housing, including affordable housing.

3. Achieves regeneration or tackles deprivation (or both).
4. Contributes to meeting strategic infrastructure needs.

Details of prioritisation assessment process

The Partnership has applied the following assessment process to come up with the lists of priority projects included in the draft LIP.

Some examples of completed assessment record sheets are attached.

Detailed assessment work continues, and in many cases the information for full assessment will need to be built up over time. Nevertheless, the assessment process has been sufficient to determine the lists included in the LIP.

The process is analytical, but also requires a degree of judgement. There is no attempt to 'score', and the assessments cannot be treated as providing a completely objective method of prioritisation.

Method

Firstly, looking at individual schemes/projects/programmes:

Stage 1

Is the scheme deliverable in the short term 2010–15?

- Will there be a start in the next five years?
- What pump priming, grant or infrastructure investment is needed in the next five years to get it going?
- Within this, look at how ready a project is to get going, include viability, whether it has planning permission, and whether the landowner is interested.

Stage 2

What does the scheme offer in respect of its strategic fit/linkages?

- Does it deliver national or regional priorities, eg SEP or RES?
- Does it deliver HCA national or regional priorities?
- Does it deliver individual LA priorities as set out in their Community Strategy and Corporate Plans?
- Does it deliver the strategic objectives as SPIP agreed at the end of 2009? (economy, housing, regeneration, and strategic infrastructure)

(At stages 1 and 2 apply the assessment criteria set out. At later stages, add supporting assessment information.)

Stage 3

What does the scheme deliver?

- Number of homes/affordable homes/% of affordable homes?
- Economic development/number of jobs?

Stage 4

Does the scheme deliver wider benefits (ie more than just the standard items to mitigate the impact of the development)?

- Is the scheme a catalyst for other development/regeneration?
- Transport/green transport benefits?
- Provision of social infrastructure?
- Other forms of additionality (e.g. environmental gain)?
- For example, does it unlock another site or provide a vital link in a road scheme etc?

Stage 5

What overall level of investment is needed?

Stage 6

Does the scheme offer value for money?

- This is a commentary, not a calculation.

Then, looking at the county-wide list of projects as a whole:

Stage 7

Does the priority list deliver a range of projects that cover all the agreed objectives?

- Does the priority list have an acceptable geographical spread, given the prevailing strategic framework?
- Does it cover urban and rural areas etc?

Appendix 4: Short Term Development and Infrastructure Summary

“short list”

Top-priority growth schemes deliverable in the short term 2010–15

District	Scheme	Total Homes 2010-30	Number of Homes 2010-15	Number of Affordable Homes 2010-15
Oxford	Oxford small and medium sites (including Blackbird/Greater Leys and windfalls) (HRA Land Capacity tbc)	n/a	3,222	1,344
South / Vale	Didcot new growth point area (part of Science Vale UK)	5,742	2,000	640
